Big idea	Concept/Aspect	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Humankind	Human body	<p><b>AOL: World</b></p> <p><b>Skill</b></p> <p>Draw pictures of the human body and name some of the different body parts.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Draw and label the main parts of the human body and say which body part is associated with which sense.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>The basic body parts are the head, arms, legs, nose, eyes, ears, mouth, hands and feet.</li> </ul> <p><b>Covered x 3</b></p> <p><b>Skill</b></p> <p>Explore the five senses and the body parts associated with them.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>The five senses are hearing, sight, smell, taste and touch.</li> <li>Ears are used for hearing.</li> <li>Eyes are used to see.</li> <li>The nose is used to smell.</li> <li>The tongue is used to taste.</li> <li>The skin gives the sense of touch.</li> </ul> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Describe the stages of human development (baby, toddler, child, teenager, adult and elderly).</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Humans grow from baby to toddler to child to teenager to adult to elderly.</li> </ul> <p><b>Covered x 3</b></p>	<p><b>Skill</b></p> <p>Describe how humans need the skeleton and muscles for support, protection and movement.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Humans have a skeleton and muscles for movement, support and protecting organs.</li> <li>Muscles are soft tissue made up of many stretchy fibres.</li> <li>Muscles allow us to move, breathe and digest food.</li> <li>The three main types of muscle in the human body are skeletal, cardiac and smooth.</li> <li>A joint is where two or more bones meet and connect.</li> <li>Parts of the human body can bend easily because the skeleton has lots of small bones and joints.</li> </ul> <p><b>Covered x 3</b></p>	<p><b>Skill</b></p> <p>Describe the purpose of the digestive system, its main parts and each of their functions.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>The digestive system is responsible for digesting food and absorbing nutrients and water.</li> <li>The mouth, oesophagus, small intestine and large intestine are organs of the digestive system.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Describe the process of human reproduction.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Humans reproduce sexually when a female egg is fertilised by a male sperm producing offspring that are different from the parents.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Name and describe the purpose of the circulatory system and the functions of the heart, blood vessels and blood.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>The heart, blood and blood vessels make up the circulatory system.</li> <li>The circulatory system moves blood around the body.</li> <li>The heart is a muscular organ that pumps blood around the body through the blood vessels.</li> <li>Blood vessels are tubes inside the body.</li> <li>The three types of blood vessels are arteries, capillaries and veins.</li> <li>Arteries carry blood from the heart to the rest of the body.</li> <li>Capillaries connect arteries to veins. They allow oxygen and other nutrients to pass from the blood to the tissues, and carbon dioxide and other waste materials to pass from the tissues to the blood.</li> <li>Veins carry blood from around the body back to the heart.</li> <li>Blood is a substance that carries oxygen, other nutrients and hormones around the body. It also carries carbon dioxide and other waste products so they can be excreted.</li> <li>Blood is made up of plasma, platelets, red blood cells and white blood cells.</li> <li>Plasma is a yellowish liquid, mainly water. It carries red blood cells, white blood cells and platelets around the body.</li> <li>Red blood cells carry oxygen and carbon dioxide around the body.</li> <li>White blood cells fight infection and other diseases.</li> <li>Platelets are small cell fragments that clump together to stop bleeding from a cut in a blood vessel.</li> </ul> <p><b>Covered x 4</b></p>
Staying safe		<p><b>AOL: PSED</b></p> <p><b>Skill</b></p> <p>Follow instructions when in different environments and when handling simple equipment, such as scissors.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Describe ways to stay safe in some familiar situations.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Ways to stay safe include: using sun cream and wearing a hat in the Sun; stopping, looking and listening when crossing the road; not touching sharp or hot objects; only eating or drinking what you know or have been given by an adult you trust.</li> <li>Using sun cream and wearing a hat helps you to stay safe in the Sun.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Describe what humans need to survive.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Humans need water, food, air and shelter to survive.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Explain why light from the Sun can be dangerous.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Light from the Sun is damaging for vision and the skin.</li> <li>People can protect themselves from the Sun by using sun cream, wearing sun hats and sunglasses and by staying indoors or in the shade.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Explain the precautions needed for working safely with electrical circuits.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Working with electrical circuits can be dangerous.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Explain the precautions needed for working safely when heating, burning, cooling and mixing materials.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Very hot and very cold materials can burn skin.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Explain the dangers of using lasers and ways to use them safely.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Lasers are intense beams of light and they should never be pointed at people's faces or aircraft.</li> </ul> <p><b>Covered</b></p>

Big idea	Concept/Aspect	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Healthy lifestyle	<p><b>AOL: PSED</b></p> <p><b>Skill</b></p> <p>Wash and dry hands regularly and say why this is important.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Explain why hand washing and cleanliness are important.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Hand washing and good hygiene prevent the spread of germs.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Describe the importance of a healthy lifestyle, including exercise, a balanced diet, good quality sleep and personal hygiene.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>A healthy lifestyle includes exercise, a balanced diet, good quality sleep and personal hygiene.</li> <li>Germs spread from person to person through direct or indirect contact.</li> <li>Risks associated with an unhealthy lifestyle include illness, obesity, tooth decay and mental health problems.</li> <li>Germs are microorganisms that can cause illness in humans.</li> <li>Germs get into the body through the eyes, nose or mouth.</li> <li>Washing hands with soap and clean running water helps humans avoid getting ill and spreading germs to others.</li> </ul> <p><b>Covered x 9</b></p>	<p><b>Skill</b></p> <p>Explain the importance and characteristics of a healthy, balanced diet.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Humans get nutrition from what they eat.</li> <li>It is important to have a balanced diet made up of the main food groups, including: proteins, carbohydrates, fruit and vegetables, dairy products and alternatives, and fats and spreads.</li> <li>Humans stay hydrated by drinking water.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Describe what damages teeth and how to look after them.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Regular teeth brushing, limiting sugary foods and visiting the dentist are important for good oral hygiene.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Explain why personal hygiene is important during puberty.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Good personal hygiene (washing, wearing clean clothes and brushing teeth) can prevent disease or illness.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Explain the impact of positive and negative lifestyle choices on the body.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Exercise benefits your heart by lowering blood pressure, reducing weight, strengthening muscles and lowering stress.</li> <li>The Eatwell guide presents the foods and drinks that contribute to a healthy balanced diet.</li> <li>The five food groups are: fruit and vegetables, carbohydrates, dairy and alternatives, proteins and oils and spreads.</li> <li>Some foods, especially highly processed ones, are high in sugar, salt and fat are not necessary for a healthy, balanced diet.</li> <li>Eating more than the recommended daily amounts of saturated fat, sugar and salt can have a harmful effect on the circulatory system, such as causing high blood pressure and an increased risk of heart disease.</li> <li>Nutrition labels on pre-packaged food help us to know what is in the food we eat.</li> <li>Nutrition labels are often displayed using a traffic light system, so consumers can easily see whether the food contains high (red), medium (orange) or low (green) amounts of sugar, salt and saturated fat.</li> <li>Smoking, drugs and alcohol can have a negative impact on the circulatory system.</li> <li>Smoking can result in cancer and heart disease.</li> <li>Alcohol can cause high blood pressure and increased stroke risk.</li> <li>Drugs can cause collapsed veins and cardiac arrest.</li> </ul> <p><b>Covered x 3</b></p>
Processes	Pattern seeking	<p><b>AOL: World</b></p> <p><b>Skill</b></p> <p>Notice and begin to describe patterns of weather in summer and winter.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Observe changes across the four seasons.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>The four seasons are spring, summer, autumn and winter.</li> <li>Certain events and weather patterns happen in different seasons.</li> </ul> <p><b>Covered x 5</b></p>	<p><b>Skill</b></p> <p>Describe typical UK seasonal weather patterns.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>The UK has typical weather in each of the seasons. For example, winter is cold and sometimes frosty, whereas summer is warm and sometimes sunny.</li> <li>Many animals behave differently in different seasons in the UK. These different behaviours, such as migration and hibernation, are linked to their life cycles, with spring often being the time for new offspring.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Find patterns in the way shadows change during the day.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Shadows change shape and size when the light source moves.</li> <li>The higher the light source the shorter the shadow.</li> <li>The lower the light source the longer the shadow.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Compare and find patterns in the pitch of a sound, using a range of equipment, such as musical instruments.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Pitch is how high or low a sound is.</li> <li>Generally, the longer, looser, bigger and thicker the sound source is the lower the pitch.</li> <li>Generally, the shorter, tighter, smaller and thinner the sound source is the higher the pitch.</li> </ul> <p><b>Covered</b></p> <p><b>Skill</b></p> <p>Compare and find patterns in the volume of a sound, using a range of equipment, such as musical instruments.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Sounds are louder when more energy is put into a sound source because the vibrations and sound waves are larger.</li> <li>The volume of sound is measured in decibels (dB).</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Use the idea of Earth's rotation to explain day and night, and the Sun's apparent movement across the sky.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>As Earth orbits the Sun, it also spins on its axis. It takes Earth a day (24 hours) to complete a full spin.</li> <li>During the day, the Sun appears to move through the sky. The Sun is not moving the Earth is rotating.</li> <li>Earth rotates to the east or, if viewed from above the North Pole, it rotates anti-clockwise, which means the Sun rises in the east and sets in the west.</li> <li>As Earth rotates, different parts of it face the Sun, which brings what we call daytime. The part facing away is in shadow, which is night time.</li> <li>Sundials block sunlight to cast a shadow. As the Earth rotates, the angle of the sunlight upon the sundial changes, and the shadow changes length and direction.</li> </ul> <p><b>Covered x 3</b></p>	<p><b>Skill</b></p> <p>Explain, using words, diagrams or a model, why shadows have the same shape as the objects that cast them and how shadows can be changed.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>When a light source is close to an object, the shadow is large because the object is blocking more of the light coming from the source.</li> <li>As a light source moves further away from an object, the shadow gets smaller because the object blocks less light coming from the source.</li> </ul> <p><b>Covered</b></p>

Big idea	Concept/Aspect	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Changes	<p><b>AOL: World</b></p> <p><b>Skill</b></p> <p>Notice and talk about the differences in day length between the seasons.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Observe and describe how day length changes across the year.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Day length is the number of hours of daylight.</li> <li>Day length is longer in the summer months and shorter in the winter months in the UK.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Describe how some objects and materials can be changed and how these changes can be desirable or undesirable.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Some objects and materials can be changed by squashing, bending, twisting, stretching, heating, cooling, mixing and being left to decay.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Describe simply how fossils are formed, using words, pictures or a model.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Fossils form over millions of years and are the remains of a once-living organism, preserved as rock.</li> <li>Scientists can use fossils to find out what life on Earth was like in prehistoric times.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Observe and explain that some materials change state when they are heated or cooled and measure or research the temperature in degrees Celsius (°C) at which materials change state.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Heating or cooling materials can bring about a change of state. This change of state can be reversible or irreversible.</li> <li>Melting is the process of a solid changing into a liquid.</li> <li>Freezing is the process of a liquid changing into a solid.</li> <li>Evaporation is the process of a liquid changing into a gas.</li> <li>Condensation is the process of a gas changing into a liquid.</li> <li>Temperature is a measure of how hot or cold something is. It is measured in degrees (°) using an instrument called a thermometer.</li> <li>The three different scales temperature can be measured in are Celsius (°C), Fahrenheit (°F) and Kelvin (K). We use the Celsius scale in the UK.</li> <li>When solid water (ice) is heated to 0°C, it begins to melt. This is called its melting point. When liquid water is cooled to 0°C, it begins to freeze. This called its freezing point.</li> <li>When liquid water is heated to 100°C, it begins to evaporate. This is called its boiling point. When gaseous water (water vapour) is cooled to 100°C, it begins to condense. This is called its condensing point.</li> <li>On Earth, temperatures range from around -80°C at their lowest to around 50°C at their highest.</li> <li>Materials exist as solids, liquids or gases.</li> <li>A material's state on Earth depends on Earth's temperature because materials have different melting and boiling point.</li> </ul> <p><b>Covered x 3</b></p>	<p><b>Skill</b></p> <p>Identify, demonstrate and compare reversible and irreversible changes.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Reversible changes include heating, cooling, melting, dissolving and evaporating.</li> <li>Irreversible changes include burning, rusting, decaying and chemical reactions.</li> <li>Irreversible changes are usually accompanied by one or more of these signs: a gas is produced; light is produced; a smell is produced or the smell changes; the colour changes; sound is produced, or the temperature changes.</li> </ul> <p><b>Covered x 5</b></p>	<p><b>Skill</b></p> <p>Describe some significant changes that have happened on Earth and the evidence, such as fossils, that support this.</p> <p><b>Covered</b></p>

Big idea	Concept/Aspect	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Earth	AOL: World Skill	Describe simply how weather changes as the seasons change.  Core knowledge	Skill Observe and describe different types of weather.  Core knowledge	Skill Describe features of Earth using words and pictures.  Assign	Skill Investigate soils from the local environment, making comparisons and identifying features.  Core knowledge	Skill Describe the water cycle using words or diagrams and explain the part played by evaporation and condensation.  Core knowledge	Skill Describe or model the movement of the planets in our Solar System, including Earth, relative to the Sun.  Core knowledge	Skill Identify that light travels in straight lines.  Core knowledge

							Skill	Skill
							Describe or model the movement of the Moon relative to Earth.  Core knowledge	Explain that, due to how light travels, we can see things because they give out or reflect light into the eye.
							<ul style="list-style-type: none"> <li>The Moon is Earth's only natural satellite.</li> <li>The Moon is about 385,000km from the Earth.</li> <li>The Moon is not a natural light source. We can only see it because it reflects the Sun's light.</li> <li>The Moon orbits the Earth once every 27.3 days and also rotates on its axis once every 27.3 days.</li> <li>A solar eclipse happens a few times a year when the Moon passes directly between the Earth and the Sun, blocking our view of the Sun and casting a shadow on the Earth.</li> <li>A lunar eclipse happens a few times a year when the Earth is in line between the Moon and the Sun, casting a shadow on the Moon.</li> </ul>	Covered x 2
							Covered x 3	

Big idea	Concept/Aspect	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Phenomena	<p><b>AOL: World</b></p> <p><b>Skill</b></p> <p>Name and describe natural phenomena, such as the size of shadows, the colours of a rainbow, the speed of clouds moving across the sky and the strength of a wave.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Rain is drops of water that fall from clouds.</li> </ul> <p><b>Covered x 3</b></p>	<p><b>Skill</b></p> <p>Explain in simple terms how shadows are formed.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Explain in simple terms how sounds are made.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Describe the differences between dark and light and how we need light to be able to see.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>A light source is something that produces light.</li> <li>A reflector is something that reflects light.</li> <li>Light is a form of energy that travels in straight lines from a light source.</li> <li>Dark is the absence of light and we need light to be able to see.</li> <li>The main natural light source on Earth is the Sun.</li> </ul> <p><b>Covered x 2</b></p> <p><b>Skill</b></p> <p>Explain, using words or diagrams, how shadows are formed when a light source is blocked by an opaque object.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Opaque objects cast dark shadows.</li> <li>Translucent objects cast lighter, blurry shadows.</li> <li>Transparent objects allow light to pass through them and do not create shadows.</li> <li>Shadows change when the light source or the object moves. The lower the light source the longer the shadow.</li> <li>A shadow is an area of darkness made when an object blocks light.</li> <li>A shadow is the same shape as the object that casts it because light travels in straight lines.</li> <li>Shadows always appear on the opposite side of the light source.</li> </ul> <p><b>Covered x 4</b></p>	<p><b>Skill</b></p> <p>Explain how sounds are made and heard using diagrams, models, written methods or verbally.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Sound waves travel through a medium, such as air or water, to the ear.</li> <li>A sound source is something that vibrates and creates a sound, such as human vocal cords, part of a musical instrument or a piece of machinery.</li> <li>Volume is a measure, in decibels, how loud or quiet sound is.</li> <li>Applying more force to a sound source adds more energy and results in a louder sound.</li> <li>Pitch is how high or low a sound is.</li> <li>Generally, the longer, looser, bigger and thicker the sound source is the lower the pitch.</li> <li>Generally, the shorter, tighter, smaller and thinner the sound source is the higher the pitch.</li> <li>Distant and direction of sound can be judged.</li> <li>When energy is put into a sound source it starts to vibrate. These vibrations disturb tiny particles of air. They vibrate and collide with each other, creating sound waves.</li> <li>When the sound waves enter the ear, the eardrum vibrates. These vibrations pass through small bones, called ossicles, and are turned into electrical signals in the cochlea. They travel to the brain and are interpreted as sounds.</li> <li>A sound wave diagram can be drawn as a wavy line with peaks and troughs.</li> <li>The distance between two peaks or troughs is called a wavelength.</li> <li>The shorter the wavelength the higher the pitch of a sound. The longer the wavelength the lower the pitch of the sound.</li> <li>The smaller the peaks and troughs the quieter the sound. The larger the peaks and troughs the louder the sound.</li> <li>Sounds are louder closer to the sound source and fainter as the distance from the sound source increases.</li> </ul> <p><b>Covered x 4</b></p>	<p><b>Skill</b></p> <p>Describe the Sun, Earth and Moon as approximately spherical bodies and use this knowledge to understand the phases of the Moon and eclipses.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>All planets are spherical because their mass is so large that they have their own force of gravity. This force of gravity pulls all of a planet's material towards its centre, which compresses it into the most compact shape – a sphere.</li> </ul> <p><b>Covered x 3</b></p>	<p><b>Skill</b></p> <p>Describe, using scientific language, phenomena associated with refraction of light.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Refraction is the bending of light as it passes from one transparent material to another.</li> <li>Refracted light creates a visible spectrum when white light shines through a prism or raindrops.</li> <li>Shadows are formed when an object blocks the passage of light, leaving an area of darkness (the absence of light).</li> <li>Shadows move and change shape during the day as Earth rotates and the Sun appears in different positions in the sky.</li> </ul> <p><b>Covered x 2</b></p> <p><b>Skill</b></p> <p>Revise the understanding of light, reflection and daylight from previous years.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Light is a form of energy that travels as waves in straight lines.</li> <li>There are natural and artificial light sources.</li> <li>Light rays bounce off a reflector's surface, making it appear to light up.</li> <li>The Sun is the natural source of light and heat for Earth.</li> <li>Sunlight contains harmful ultraviolet (UV) rays. UVA rays age our skin and UVB rays cause sunburn. UV rays increase the risk of skin cancer.</li> <li>The Earth rotates on its axis once every 24 hours. When a part of the Earth rotates to face the Sun, the light creates daytime. When it rotates away from the Sun, the absence of light creates night time.</li> </ul> <p><b>Covered</b></p>
	Forces	<p><b>AOL: World</b></p> <p><b>Skill</b></p> <p>Describe, predict and sort things that float and sink and talk about the forces that they can feel.</p> <p><b>Covered x 3</b></p>	<p><b>Skill</b></p> <p>Investigate weather using toys, models or simple equipment.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Simple equipment can be used for measuring weather including windsocks, thermometers and rain guages.</li> </ul> <p><b>Covered x 4</b></p>	<p><b>Skill</b></p> <p>Sort and group objects that float and sink.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Some objects float and others sink.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Explain that an object will not move unless a push or pull force is applied, describing forces in action and whether the force requires direct contact or whether the force can act at a distance (magnetic force).</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Forces cause objects to move, change speed or change shape.</li> <li>Some push and pull forces require direct contact.</li> <li>Friction is a force between two surfaces as they move across each other.</li> <li>Friction slows down a moving object.</li> <li>Friction produces heat, which can be a problem.</li> </ul> <p><b>Covered x 3</b></p>	<p><b>Covered x 4</b></p> <p><b>Skill</b></p> <p>Predict and describe whether a circuit will work based on whether or not the circuit is a complete loop and has a battery or cell.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>A series circuit must be a complete loop to work and have a source of power from a battery or cell.</li> </ul> <p><b>Covered</b></p>	<p><b>Skill</b></p> <p>Explain that objects fall to Earth due to the force of gravity.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Gravitational force, or gravity, is a non-contact, pulling force between objects that have mass.</li> <li>Gravitational force increases as the mass of an object increases.</li> <li>The mass of the Earth is very large so it exerts a gravitational force large enough for its effects to be seen.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Explain how the brightness of a lamp or volume of a buzzer is affected by the number and voltage of cells used in a circuit.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Voltage is measured in volts (V).</li> <li>The bigger the voltage, the more electrons are pushed through the circuit.</li> <li>The more voltage flowing through a lamp, buzzer or motor, the brighter the lamp, the louder the buzzer and the faster the motor.</li> </ul> <p><b>Covered</b></p>

Parts and functions	AOL: World Skill Assign	Name and describe basic features of plants and trees.	Skill Label and describe the basic structure of a variety of common plants.  Core knowledge <ul style="list-style-type: none"> <li>The basic plant parts include root, stem, leaf, flower, petal and fruit.</li> <li>Trees have a woody stem called a trunk.</li> <li>Plants grow from seeds or bulbs.</li> </ul>	Skill Describe how plants need water, light and a suitable temperature to grow and stay healthy.  Core knowledge <ul style="list-style-type: none"> <li>Plants need water, light and a suitable temperature to grow and stay healthy.</li> <li>Many plants grow from seeds or bulbs.</li> <li>Plants have roots, stems, leaves, flowers and fruit.</li> <li>A bulb contains a tiny plant and all the food needed to grow.</li> </ul>	Skill Name and describe the functions of the different parts of flowering plants (roots, stem, leaves and flowers).  Core knowledge <ul style="list-style-type: none"> <li>Many plants grow from seeds or bulbs.</li> <li>Plants have roots, stems, leaves, flowers and fruit.</li> <li>Roots anchor the plant in the ground and transport water and minerals from the ground to the plant.</li> <li>The stem (or trunk) support the plant above the ground.</li> <li>Leaves collect energy from the Sun and make food for the plant.</li> <li>Flowers make seeds to produce new plants.</li> <li>Parts of a flower include the sepal, petal, stamen and carpel.</li> </ul>	Skill Identify the four different types of teeth in humans and other animals, and describe their functions.  Core knowledge <ul style="list-style-type: none"> <li>A baby grows 20 primary teeth that start to fall out when a child is six years old. They are replaced by 32 adult teeth.</li> <li>The four different types of teeth are incisors, canines, premolars and molars.</li> <li>Incisors have sharp, straight edges for slicing and cutting food.</li> <li>Canines are pointed for gripping and tearing chewy food such as meat.</li> <li>Pre-molars and molars are wide and have cusps, for crushing and grinding up food so it is small enough to swallow.</li> </ul>	Skill Label and draw the parts of a flower involved in sexual reproduction in plants (stamen, filament, anther, pollen, carpel, stigma, style, ovary, ovule and sepal).  Core knowledge <ul style="list-style-type: none"> <li>Parts of a flower include the stamen, filament, anther, pollen, carpel, stigma, style, ovary, ovule and sepal.</li> </ul>	Skill Identify that living things produce offspring of the same kind, although the offspring are not identical to either parent.  Core knowledge <ul style="list-style-type: none"> <li>Inheritance is when living things pass on characteristics following sexual reproduction, such as height, skin colour and eye colour.</li> <li>Variation is the natural differences in characteristics between individuals of the same species.</li> <li>Continuous variation contains a range of values, such as the height or mass of different individuals of the same species.</li> <li>Discontinuous variation has a certain number of outcomes, such as eye colour and blood groups.</li> </ul>
Nutrition	AOL: World Skill	Match animals to the foods that they eat.	Skill Group and sort a variety of common animals based on the foods they eat.  Core knowledge <ul style="list-style-type: none"> <li>Carnivores eat other animals (meat), herbivores eat plants and omnivores eat other animals and plants.</li> </ul>	Skill Interpret and construct simple food chains to describe how living things depend on each other as a source of food.  Core knowledge <ul style="list-style-type: none"> <li>Food chains show how living things depend on one another for food. Plants always start a food chain because they are producers that make their own food using sunlight.</li> <li>Prey animals have different ways to avoid capture by predators.</li> <li>Plants have adaptations that protect them from being eaten by animals.</li> </ul>	Skill Compare and contrast the diets of different animals.  Core knowledge <ul style="list-style-type: none"> <li>Nutrition is the life process of making or finding food to eat.</li> <li>Humans must eat food and drink water to gain the nutrients they need to survive.</li> <li>Humans are omnivores, so they can eat both plant parts and animals.</li> <li>In the wild, animals' diets change over the year as the seasons change due to certain foods becoming available or unavailable.</li> <li>Carnivores only eat meat.</li> <li>Herbivores only eat plants.</li> <li>Omnivores eat meat and plants.</li> </ul>	Skill Construct and interpret a variety of food chains and webs to show interdependence and how energy is passed on over time.  Core knowledge <ul style="list-style-type: none"> <li>Food chains start with a plant (producer), show what animals eat within a habitat and how energy is passed on over time.</li> <li>A producer is a living thing that makes its own food for energy. Almost all producers are plants.</li> <li>Producers make their own food through the process of photosynthesis. Grass and seaweed are examples of producers.</li> <li>A consumer is a living thing that feeds on other living things. Most consumers are animals. Wolves and penguins are examples of consumers.</li> <li>A predator is a consumer that hunts, kills and eats other animals for food. An animal is called prey if it is killed by a predator for food.</li> <li>All the different food chains in a specific ecosystem can be linked together. These connected food chains are called a food web.</li> <li>An ecosystem is a community of living organisms and their environments that are interdependent.</li> <li>Ecosystems have biotic, or living, features including plants, animals and microorganisms. They also have abiotic, or non-living, features including sunlight, water, air, soil and temperature.</li> </ul>	Skill Describe, using their knowledge of food chains and webs, what could happen if a habitat had a living thing removed or introduced.  Core knowledge <ul style="list-style-type: none"> <li>Population changes in a habitat can have significant consequences for food chains and webs.</li> </ul>	Skill Explain that the circulatory system in animals transports oxygen, water and nutrients around the body.  Core knowledge <ul style="list-style-type: none"> <li>The human body has different systems that support the seven life processes.</li> <li>The skeletal system supports movement, gives the body shape and protects the organs.</li> <li>The skeletal muscular system supports movement.</li> <li>The endocrine system supports growth.</li> <li>The nervous system supports sensation and movement as it controls almost everything the body does.</li> <li>The digestive system supports nutrition by breaking down food so the body can absorb nutrients.</li> <li>The excretory system supports excretion (getting rid of waste).</li> <li>The reproductive system supports reproduction.</li> <li>The respiratory system supports respiration by taking in oxygen when we breathe in and removing carbon dioxide when we breathe out.</li> <li>The circulatory system supports the transport of oxygen, water and nutrients around the body.</li> </ul>

Big idea	Concept/Aspect	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Survival	<p><b>AOL: World</b></p> <p><b>Skill</b></p> <p>Describe some ways that plants or animals should be cared for in order for them to survive.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>In winter the days are short and the nights are cold. Some birds need us to feed them during winter to help them survive.</li> <li>Plants need water, sunlight and air to grow and survive.</li> <li>Pets need food, water, sleep, exercise and play to keep them happy and healthy.</li> </ul> <p><b>Covered x 5</b></p>	<p><b>Skill</b></p> <p>Describe how to care for plants and animals, including pets.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Living things need to be cared for in order for them to survive.</li> <li>Living things need water, food, warmth and shelter.</li> </ul> <p><b>Covered x 4</b></p>	<p><b>Skill</b></p> <p>Explain how animals, including humans, need water, food, air and shelter to survive.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>An animal's habitat must provide water, food, air and shelter for the animal to survive.</li> <li>Animals eat food that is found in their habitat. Herbivores eat plants. Omnivores eat plants and animals (meat). Carnivores eat other animals (meat).</li> </ul> <p><b>Covered x 9</b></p>	<p><b>Skill</b></p> <p>Describe the requirements of plants for life and growth (air, light, water, nutrients and room to grow) and how they vary from plant to plant.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Plants are living things because they grow, take in water and nutrients and reproduce.</li> <li>Plants need air, light, water, nutrients and room to grow, in order to survive.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Explain how adaptations help living things to survive in their habitat.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Describe the life process of reproduction in some plants and animals.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Sexual reproduction is the process of producing offspring and is essential for the continued survival of a species.</li> <li>Asexual reproduction involves one parent and produces offspring that is identical to the parent.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Identify how animals and plants are adapted to suit their environment, such as giraffes having long necks for feeding, and that adaptations may lead to evolution.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>An adaptation is a physical or behavioural trait that allows a living thing to survive and fill an ecological niche.</li> <li>Natural selection is also known as 'survival of the fittest' because favourable traits help an organism survive and pass on their genes through reproduction.</li> <li>The three different types of plant adaptations are structural, behavioural and chemical.</li> <li>Structural adaptations include modified leaves, roots and trunks.</li> <li>Behavioural adaptations include movement towards the Sun and regulated growth.</li> <li>Chemical adaptations include the presence of stings and poisons.</li> </ul> <p><b>Covered x 4</b></p>

Place and space	Habitats	<p><b>AOL: World</b></p> <p><b>Skill</b></p> <p>Observe and describe living things and their habitats within the local environment.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Animals such as snails, spiders and insects live in gardens, fields, parks and woodlands.</li> <li>Animals live in different habitats.</li> <li>Rock pools are habitats for many animals, such as starfish, crabs, anemones, mussels, barnacles and periwinkles.</li> <li>Animals live in different habitats.</li> <li>The ocean is the habitat for many animals, such as fish, dolphins, whales, sharks and turtles.</li> </ul> <p><b>Covered x 4</b></p>	<p><b>Skill</b></p> <p>Observe the local environment throughout the year and ask and answer questions about living things and seasonal change.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>The local environment is a habitat for living things and can change during the seasons.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Describe a range of local habitats and habitats beyond their locality (beaches, rainforests, deserts, oceans and mountains) and what all habitats provide for the things that live there.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>A habitat is a place where plants and animals live.</li> <li>Local habitats include parks, woodland and gardens. Habitats beyond the locality include beaches, rainforests, deserts, oceans and mountains.</li> <li>A habitat provides food, water, shelter and space.</li> <li>Humans can damage or destroy habitats. Their actions can harm and even kill living things.</li> <li>Humans can help habitats. They can create new habitats, make habitats safer or provide food and shelter for living things.</li> </ul> <p><b>Covered x 8</b></p>	<p><b>Skill</b></p> <p>Describe how environments can change due to natural influences and how living things need to be able to adapt to these changes.</p> <p><b>Assign</b></p>	<p><b>Skill</b></p> <p>Describe how environments can change due to human and natural influences and the impact this can have on living things.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Humans can affect habitats in negative or positive ways.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Research and describe different farming practices in the UK and how these can have positive and negative effects on natural habitats.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Arable (growing crops), pastoral (raising livestock), mixed (arable and pastoral) are the three main types fo farming in the UK.</li> <li>Intensive farming in the past has resulted in the loss of habitats.</li> </ul> <p><b>Covered x 2</b></p>	<p><b>Skill</b></p> <p>Research unfamiliar animals and plants from a range of habitats, deciding upon and explaining where they belong in the classification system.</p> <p><b>Core knowledge</b></p> <ul style="list-style-type: none"> <li>Living things are classified into groups, according to common observable characteristics and based on similarities and differences.</li> <li>Microorganisms are microscopic living things found in the fungus, protista and monera kingdoms.</li> <li>Microorganisms and can be helpful or harmful to other living things.</li> <li>Viruses are not included in the kingdoms as they are not living and need a host to survive and reproduce.</li> </ul> <p><b>Covered x 3</b></p>
